11.4

Readability Test Result

https://previewue-z1ou.vercel.app/

Your page has an average reading ease of about **11.4 of 100**. It should be easily understood by 19 to 20 year olds.

Result Details

The indicator bars give a visual guide for the readability of the text. Red is a low readability score. Green is easily readable.

Flesch Kincaid Reading Ease	11.4

The Flesch Kincaid readability scores are the most widely used measures of readability. Your score is based on a ranking scale of 0-100, and the higher your score the better. For most businesses, 65 is a good target. A value between 60 and 80 should be easy for a 12 to 15 year old to understand.

Formula: 206.835 - 1.015 x (words/sentences) - 84.6 x (syllables/words)

Grade Level indicators

These equate the readability of the text to the US schools grade level system.

Flesch Kincaid Grade Level   15.4

The Flesch Kincaid readability scores are the most widely used measures of readability. Your score is based on the American school grade you would need to be in to comprehend the material on a page. 7th grade is a good target.

Formula: 0.39 x (words/sentences) + 11.8 x (syllables/words) - 15.59

Gunning Fog Score   12.4

The Gunning Fog score estimates the years of formal education needed to comprehend text on the first reading. You should aim for a 7-8 — anything higher than 12 is too complex for most people to read.

Formula: 0.4 x ((words/sentences) + 100 x (complexWords/words))

SMOG Index   12.8

An acronym for Simple Measure of Gobbledygook, the SMOG index estimates the years of education a person needs to comprehend writing.

Formula: 1.0430 x sqrt(30 x complexWords/sentences) + 3.1291

Coleman Liau Index   16.7

The Coleman Liau Index is designed to evaluate the U.S. grade level necessary to understand text. Your score indicates the U.S. school level a person needs to be to understand the text.

Formula: 5.89 x (characters/words) - 0.3 x (sentences/words) - 15.8

Automated Readability Index   12

The Automated Readability Index is designed to measure how easy your text is to understand and gives you an estimate of the U.S. grade level necessary to comprehend a passage.

Formula: 4.71 x (characters/words) + 0.5 x (words/sentences) - 21.43

Coleman Liau and ARI rely on counting characters, words and sentence. The other indices consider number of syllables and complex words (polysyllabics - with 3 or more syllables) too. Opinions vary on which type are the most accurate. It is more difficult to automate the counting of syllable as the English language does not comply to strict standards!

Detected Tone: Persuasive

Confidence: High

The text uses persuasive language to encourage readers to enroll in educational programs by highlighting success stories, high acceptance rates, and special offers.

Sentences That May Need Attention

Here are some examples from your text that could be improved for better readability:

HARD SENTENCE (SCORE 10-15)

Tenang, IELTS Academy siap bantu dari dasar sampai mahir!

Complexity: 12.83

PASSIVE VOICE SENTENCE

No passive voice sentences found

SENTENCE WITH ADVERB

I can finally get 8.0 in the IELTS test.

Complexity: 2.34

Rewrite Suggestions

Here are AI-powered suggestions to improve the problematic sentences:

Complex Sentence Fix

ORIGINAL

Tenang, IELTS Academy siap bantu dari dasar sampai mahir!

IMPROVED

Don't worry, IELTS Academy is ready to help you from the basics to advanced levels!

The sentence was split into two parts to improve readability, and simpler words were used to convey the same message more clearly.

Adverb Usage Fix

ORIGINAL

I can finally get 8.0 in the IELTS test.

IMPROVED

I achieved an 8.0 in the IELTS test.

The adverb 'finally' was replaced with the stronger verb 'achieved' to convey the sense of accomplishment more effectively.
